## OBJECTIVE

Motivated IT and Cybersecurity graduate with hands-on experience in security analysis, troubleshooting, and system support. Skilled in resolving technical issues, supporting end-users, and analyzing potential security threats. S**eeking an entry-level or internship role in IT Support, Help Desk, or Security Operations where I can contribute to reliable and secure technology environments.**

## EDUCATION

**University of Michigan – Flint, MI**
Bachelor of Science in Information Technology and Informatics — *December 2024*

- Honors Graduate | GPA: 3.70 | Dean's List (6 semesters)

**Second Major: Cybersecurity** — *Expected December 2026*

## EXPERIENCE

**Cyber Fraud Analyst Intern**
Comerica Bank — Enterprise Security | *May 2025 – August 2025*

- Monitored and analyzed user activity to detect suspicious behavior and potential security threats
- Investigated account anomalies and supported incident response and remediation efforts
- Collaborated with cybersecurity and fraud teams to resolve issues efficiently
- Documented incidents, procedures, and resolutions to support knowledge sharing
- Communicated technical findings clearly to both technical and non-technical stakeholders
- Assisted in troubleshooting user access and security-related issues across systems

## TECHNICAL SKILLS

- **IT Support & Systems:** Windows OS, basic macOS, hardware/software troubleshooting
- **Networking:** TCP/IP, HTTP/HTTPS, connectivity troubleshooting
- **Security:** Threat detection, credential compromise analysis, incident investigation basics
- **Microsoft Tools:** Microsoft Office (Excel, Word, PowerPoint), Microsoft 365 (Outlook, Teams, SharePoint)
- **Programming:** Java, Python, JavaScript, C++
- **Web Development:** HTML, CSS, React, Flask
- **Databases:** SQL (MySQL, PostgreSQL)
- **Tools:** Git, Adobe Acrobat, Photoshop
- **Support Tools:** Familiarity with IT ticketing systems and support workflows

## PROJECTS

**E-Commerce Web Application**

- Developed a responsive web application using HTML, CSS, and JavaScript
- Implemented authentication, shopping cart, and checkout functionality
- Diagnosed and resolved front-end and performance issues

**Database Design Project**

- Designed relational database using SQL (tables, relationships, queries)
- Built interface for efficient data interaction and management
- Optimized queries and resolved performance issues

## ADDITIONAL IT EXPERIENCE

- Provided technical support for Windows devices, mobile devices, and software installations, including troubleshooting system and connectivity issues.
- Assisted users with troubleshooting connectivity, application, and performance issues

## ACTIVITIES

- Member, Innovators and Makers Club
- Volunteer, Oxford Gives Back Program
